

MONTANARO

DISTILLERIA FONDATA NEL 1885

LE BOTANICHE

OUR LIQUEUR IS OBTAINED FROM THE MACERATION OF TANSY LEAVES IN GRAPPA.

This process gives life to a unique and particular product creating an intense yellow-amber colour. The strong and harmonious aroma and the slightly balsamic taste give a sensation of freshness to those who consume it. The Gentian aftertaste also enhances its digestive abilities.

The Italian name of "Arquebuse" is "Tanaceto", it derives from ancient Greek and means immortal as it originates from a very strong and resistant plant.

common name: *Tanaceto*
scientific name: *Tanacetum*
family: *Asteraceae*
